

Eshwiitood* Ni-Kwayachi-Kuskehtanan**- Ready, Willing, and Able! Pre-CAHR CBR Skills-building Workshop

Saskatoon, Saskatchewan May 8 and 9, 2019

* Ojibwe for to be able to ascertain, wait for something ** Cree for ready, willing and able

What is this workshop about?

Ready

- Opportunity to attend a ground-breaking HIV/HCV Community Based Research (CBR) training workshop in Saskatoon that will be culturally appropriate, and Indigenous-led by local researchers, front-line organizations, and activists from Saskatchewan and Manitoba.

Willing

- We will weave land-based experience and Indigenous ways of knowing into the workshop format in collaboration with local Saskatchewan & Indigenous research organizations. Workshop will include a presentation on Two-eyed Seeing and CBR with Indigenous people.

Able

- Educational topics will include case studies of HIV and HCV CBR/Patient-Oriented research- with a Program Science focus. Workshop will include a presentation on cultural responsive framework led by Willie Ermine, Sturgeon Lake FN.

When is this Workshop?

May 8-9th, 2019, just before the Canadian Association for HIV Research (CAHR) Conference in Saskatoon

Background:

Saskatchewan has the highest rate of HIV in Canada, and Indigenous populations within Saskatchewan and throughout Canada continue to be disproportionately affected.

As part an effort to address this situation, this CBR skills building workshop will bring together Indigenous community members, peer research associates, research leaders and others to build community based research capacity, discuss the scale-up of successful interventions, and seek solutions to key issues impacting HIV/HCV/STBBI treatment, care, and preventative programming. The workshop will take place as an ancillary meeting of the 28th Annual Canadian Conference on HIV/AIDS Research and is a partnership between the: Canadian Association for HIV Research (CAHR); Canadian Society for International Health (CSIH); Canadian Institutes of HIV Research (CIHR); Cameco Chair in Indigenous Health, University of Saskatchewan; Universities Without Walls (UWW); Saskatchewan Centre for Patient-Oriented Research (SCPOR); the Canadian Aboriginal AIDS Network (CAAN); and the Saskatchewan HIV/AIDS Research Endeavour (SHARE).

Limited space is available, please register right away!
